

VAIBHAVI KUMARI

Full Stack Developer

+91 6205451214 tandon16vaibhavi@gmail.com LinkedIn GitHub

Professional Summary

Full Stack Developer with 4+ years of experience designing, building, and scaling enterprise-grade and data-driven web platforms using Python, Django, FastAPI, and Vue.js. Strong background in system design, microservices, and cloud-based deployments with proven success delivering business-critical applications in retail and fintech environments. Experienced in performance optimization, cross-functional collaboration, and technical ownership of products from architecture through production.

Technical Skills

Programming Languages: Python, SQL, JavaScript, HTML5, CSS3, Tailwind CSS
Frameworks: Django (REST, ORM), FastAPI, Flask (Microservices), Vue.js
Databases: MySQL, PostgreSQL
Cloud & DevOps: Azure, Docker, Kubernetes, Nginx, CI/CD
Distributed Systems: REST APIs, Redis, Celery, Microservices, Asynchronous Processing
Engineering Concepts: System Design, OOP, Multithreading, Performance Optimization
Tools: Git, PyTest, Jira, VS Code, Jupyter Notebook, MySQL Workbench
Leadership: Team Mentoring, Technical Ownership, Cross-Functional Collaboration

Work Experience

Landmark Group – Data Labs

Nov 2024 – Present

Senior Application Developer (Assistant Manager)

Bangalore, India

- Leading the architecture, design, and development of enterprise-grade web platforms supporting multiple business units with high scalability, security, and maintainability.
- Spearheaded development of **PriceScope**, a retail pricing intelligence platform enabling competitor monitoring, dynamic pricing strategies, and real-time analytics.
- Achieved **80% performance improvement** by building FastAPI-based asynchronous services, implementing Redis caching, optimizing SQL queries, and designing Celery task pipelines.
- Designed microservice-based systems, standardized REST APIs, and managed automated **Azure CI/CD pipelines** for cloud-native deployments.
- Collaborated closely with product, analytics, and business stakeholders to translate requirements into scalable technical solutions.
- Took end-to-end technical ownership of business-critical products, mentoring junior engineers and enforcing engineering best practices.
- Engineered a **Margin Forecasting Platform** to improve revenue prediction accuracy and financial planning for enterprise leadership.
- Modernized database architecture, reducing redundancy and significantly improving query performance and system stability.

A Plus Topper

Jan 2022 – Nov 2024

Software Engineer

- Core contributor to an algorithmic trading platform supporting thousands of active users and real-time financial operations.
- Built and scaled backend services using Python, Django, and MySQL, integrating Redis caching and Celery-based background processing.
- Designed optimized relational schemas and high-performance APIs to support low-latency trading workflows.
- Developed automated data pipelines and real-time processing systems for financial analytics and reporting.
- Managed cloud infrastructure and CI/CD deployments, ensuring high system reliability, availability, and secure releases.
- Delivered multiple client-facing financial tools enabling data-driven trading and investment decisions.

Key Projects

Central Pricing Application | Django, FastAPI, MySQL, Vue.js, Azure

- Developed a large-scale enterprise pricing intelligence system for GCC retail operations, improving pricing accuracy by 35%.
- Built secure REST APIs, real-time processing services, and analytics dashboards for business leadership.
- Integrated Vue.js frontends with low-latency FastAPI services to support high-volume transactional workloads.
- Implemented distributed caching and optimized SQL queries to efficiently handle millions of pricing records.
- Collaborated with multiple enterprise teams to ensure seamless system integration and production stability.

Margin Estimation Tool | Django, Flask, MySQL, Vue.js

- Designed and delivered a margin forecasting system used by leadership teams to guide budget and pricing strategy.
- Implemented microservices architecture to enable independent scalability and system resilience.
- Built secure REST APIs and automated data workflows to deliver real-time financial KPIs.
- Developed interactive dashboards that reduced manual financial analysis time by 40%.
- Ensured compliance with enterprise security and data handling standards.

Achievements

- Led a cross-functional engineering team to successfully deliver a business-critical enterprise platform at Landmark Group.
- Recognized as an **A+ Top Performer** for consistent excellence in technical delivery and ownership.
- Conducted and cleared **25+ technical interviews**, supporting large-scale engineering hiring initiatives.
- Served as a dependable technical lead, mentoring engineers and driving collaboration across departments.
- Consistently selected for high-impact, innovation-focused enterprise initiatives.

Education

Biju Patnaik University of Technology, Rourkela
Bachelor of Technology in Computer Science

Aug 2018 – May 2022
Odisha, India
